Island Park, Idaho
16" Hand Hewn - EverLog Siding

LEAVE A LASTING LEGACY

In 2000, devastating Montana wildfires destroyed hundreds of homes and prompted us to ask: "How do you build a log home that will not burn?" At that moment EverLog® Systems and our concrete logs were born. Since then, we have been designing and providing worry-free concrete log homes, log cabins and a wide range of commercial structures across the country. With every structure our mission is the same: provide beautiful, realistic and worry-free log products that both solve the traditional problems with wood log construction and give you peace of mind.

WE MANUFACTURE WORRY-FREE CONCRETE LOGS, SIDING AND TIMBERS

“My wife and I love to fly fish and constantly maintaining a house cuts into our fishing time. Concrete doesn’t require any maintenance and gives the neighbors something fun to talk about.”

Craig Brewerton, Homeowner - Henry’s Lake, ID

WORRY-FREE HOMES

EverLog products are the worry-free and environmentally friendly solution to wood logs, timbers and siding. Made of composite concrete materials, our exterior logs offer the exact character, texture, and warm appeal of quality wood logs. EverLog products eliminate the costly maintenance and susceptibility to fire, mold, insects and other problems commonly associated with wood.

Features and Benefits:

- Fire Resistant
- Maintenance Free
- No Preserving, Re-Staining or Re-Sealing Required
- Mold Free
- No Decay
- Insect Free
- Environmentally Friendly
- Highly Energy Efficient
- No Harvesting of Trees

“When we decided to build the home we plan to live in for the rest of our lives we also wanted a house that would be a legacy for generations to come. We wanted a log house built but weren’t excited about the maintenance issues that usually accompany that construction method.”

Don & Bonnie Toland, Homeowner - Pagosa Springs, CO

Missoula, Montana
10" Plank - EverLog Siding • Board and Batten - EverLog Siding

HOMES THAT LAST FOR GENERATIONS

Structural Performance:

- No Shifting, Twisting, Settling, Shrinking or Checking
- Superior Performance in Natural Disasters including Wildfires, Earthquakes, Hail and Hurricanes

Cost Savings:

- Lower Homeowners' Insurance Premiums
- Competitively Priced with Hand-Crafted Wood Logs
- Higher Resale Value

“I had no idea they were concrete simulated logs until I went up and touched them and I’m a Certified Arborist!”

Theresa Schrum, Certified Arborist, Bozeman, MT

- Eco-Terra Landscape

Ottawa, Kansas
16" Hand Hewn - EverLog Siding and 12" EverLog Timbers

LIKE WOOD, ONLY BETTER

Unique Textures:

EverLog Siding unique textures including Hand-Hewn (adze), Timber, Round (milled), Rustic and Rough Sawn textures. Each panel replicates the grain, knots, and checks found in natural wood timbers and is an instant and dramatic improvement to any structure.

Ease of Installation:

Because EverLog Siding panels cover more wall area, less time is spent on installation and cutting. Additionally, fewer fasteners are required.

Three Dimensional Profile:

EverLog Siding Panels are three-dimensional that extends from the wall by 1-1/2 to 3-3/4 depending on the profile. This feature gives the unmistakable appearance of heavy wood timber.

“We get rave reviews from friends and family about how real it looks. We couldn’t be happier with your product and customer service.”

Tom and Stephanie B., Homeowners - Divide, Montana

Arkdale, Wisconsin

EVERLOG SIDING

What is EverLog® Siding?

EverLog Siding is an engineered concrete log siding and concrete timber siding product used in renovations and new construction. Designed to perform better than wood, our simulated log siding will instantly transform the look and performance of any cabin, home or commercial structure. Worry-Free EverLog Siding is a patented, revolutionary engineered concrete simulated log siding. Made of lightweight reinforced concrete, EverLog Siding eliminates the costly maintenance, susceptibility to fire, mold, insects, and other problems commonly associated with wood logs or other siding materials.

#1 Reason to Choose EverLog Siding:

Exact Look and Feel of Natural Wood Logs

Notice the knots, growth rings and grain marks in our concrete log siding. After seeing our concrete log homes, people frequently tell us how amazed they are at not being able to distinguish our concrete log siding from a natural wood log siding.

8" Round, Classic Gold

12" Round, Historic Brown

Our premium EverLog products provide peace of mind.

EverLog Siding solves the traditional issues associated with wood log siding like maintenance, rot, bugs, wildfire, shifting and settling, etc. Our patented log siding design combines an amazingly realistic log looking exterior with a worry-free, high-strength and easy to install log siding.
Once applied, our log siding products instantly transform the look and performance of any structure.

Features and Benefits:

- Worry Free
- Fire Resistant
- Resistant to insects and woodpeckers
- Maintenance Free.
- No Preserving, Re-Staining or Re-Sealing Required
- Mold Free
- No Decay
- Insect Free
- Environmentally Friendly
- Highly Energy Efficient
- No Harvesting of Trees
- Superior performance in wildfires
- Substantially reduces maintenance and operating cost over life of the structure
- Easy installation with common tools

12" EverLog Timbers

What are EverLogs®?

EverLogs are insulated structural handcrafted concrete logs used on everything from log houses and log cabins to luxury log homes. Typically used as an exterior wall system, EverLogs provide superior performance and appearance.

EverLogs eliminate the structural instability, costly maintenance, and susceptibility to fire, mold, insects, and other problems commonly associated with wood log construction.

Log profiles include: hand-hewn, round, square, barn wood, recycled timber and others. Corner styles include dovetail, square, butt and pass, posted, and round. Custom profiles and colors are also available.

What are EverLog® Timbers?

EverLog Timbers are worry free, engineered structural concrete components used as trusses, posts, beams, outlookers, knee braces and other custom pieces. All these components provide the WOW factor and make a dramatic and immediate impact to your project.

Whatever your architectural style we have a profile for you.

We offer a range of structural concrete log profiles to suit every design. EverLog profiles range from Mountain Rustic, Contemporary, Timber Frame, Western Log and Timber, etc. To compliment your design and style of home we offer a range of color and chinking options. Furthermore, our system is so flexible we offer our clients the option to customize any color and patina they seek.
